

Bob Constable visited Edinburgh from 18 September - 13 November 2009

He gave technical lectures and had meetings with local researchers at Leeds (October 21st-22nd), Edinburgh (October 27th), St Andrews (November 3), Heriot-Watt (November 6th) Correct-by-Construction Protocols in the Logic of Events: An Investigation into the Foundations of Distributed Computing
For abstract, see e.g. <http://www.cs.st-andrews.ac.uk/node/4117>

He also gave a public lecture in Edinburgh on November 10th
Creating Knowledge in the Age of Digital Information

In Edinburgh, he interacted primarily with Bundy, Jackson and Fourman.

During the period October 14 - 21 two researchers from Constable's group at Cornell, Mark Bickford and Richard Eaton, visited and, together with Constable, had detailed discussions with Jackson and others from SICSA, on how they formally verify distributed protocols using the Nuprl theorem prover.
