

Chen visited St Andrews from Curtin University in Perth, Western Australia, where he was a post-doctoral research fellow. He worked with researchers from St Andrews on Cloud Computing and on techniques for developing mashups. He also worked with Jeff Pan from Aberdeen on using ontologies in software engineering and presented seminars in St Andrews and at the 2009 SICSA PhD conference in St Andrews. The visit has led to a longer-term collaboration between St Andrews and Univ. Western Australia, where Chen is now a lecturer.
