

## **International Conference on Machine Learning (ICML2012)**

The ICML conference was held from June 26 -- July 1. It attracted a large amount of participants, with approximately 744 attendees in total, of which 304 were students.

This was the largest ICML conference ever. There were 304 student attendees, who arrived from 28 countries worldwide, including 79 from the UK. Approximately 32 of these were based in Scotland. In the technical programme, there were 890 papers submitted, which was over 50% more than last year, and also the largest of any ICML conference. Of these, 242 were accepted for presentation (27% acceptance rate).

Thanks to the generous contribution from SICSA, we were able to provide complementary registration for 10 PhD students based in Scotland.
