

Distinguished Visitor Report – Prof. Nitin H Vaidya

Prof Vaidya visited Edinburgh between Tue, 16th Aug and 19th Aug 2011. This ended up being a much shorter trip than originally planned. Even so, Nitin gave two seminars to the SICSA community, one on "Network-Aware Distributed Algorithms" on 16th Aug and the second on "Multi-Channel Wireless Networks: Theory to Practice" on 17th Aug.

He was also interviewed for the Computer Science Podcast on 18th Aug (<http://www.computersciencepodcast.com/episodes/18/18-full-nitin-vaitya.mp3> and <http://www.computersciencepodcast.com/episodes/18/18-nitin-vaitya.mp3>). During his brief visit to Edinburgh, he also met with several academics from within Edinburgh (John Thompson, Harald Haas, Peter Buneman, Subramanian Ramamoorthy, Rahul Santhanam, etc.) and those from other SICSA institutions (e.g., Saleem Bhatti from St Andrews).
